# WHITEPAPER

10,000 digital NFT collectibles and avatars. Proof of ownership stored on the Binance Smart Chain.

## Haz Punk, Much doge

DogePunks3Ds (DP3Ds) are digital collectibles that are randomly generated. Only 10,000 will ever exist and each NFT will allow owners to have their own 3D playable avatar in the upcoming 3D DP3D DogeVerse.

The DP3D DOGEVERSE consists of a 3D social hub and multiple games in an ever-expanding digital environment. Players will compete for high scores in daily and weekly play-to-earn competitions where players win collectables, equipment, combinator tickets and much more. Every other weekend special events will be hosted where players compete to earn big BNB prizes along with giveaways to DP3D owners, these prizes are financed by Combinator and Equipment fees.

DP3Ds are the main characters in a huge DogeVerse of content and games! Each DP3D has a unique set of attributes and is created using a proprietary algorithm ensuring a fair and random distribution.

# Minting Roadmap

多くのドージ

The DP3D team has put much thought into a delivery schedule that would result in a minting phase filled with reveals and feature launches! As more is revealed the whitepaper sections for these features will be updated. The DP3D marketplace will launch before all DP3Ds are minted to ensure a healthy floor price when the DP3D Social hub and Games launch.

First game launches

# The economics of DogePunks3D

DogePunks3D has a number of reward structures and upcoming play to earn mechanics. These are designed to increase demand for the DP3Ds so as to create a healthy secondary market with a rising price floor as well as creating an engaging and competitive game environment with big prizes to compete for regularly.

## ✓ Minting rewards

5% of minting fees are reflected to all DP3D holders.

## ✓ Marketplace rewards

Any sale of a DP3D or Equipment on the DP3D marketplace will incur a 10% tax, 5% of this tax is reflected to all DP3D holders the other 5% to the original minter of the DP3D.

## ✓ BNB Prizes

Every other weekend special events will be hosted with BNB prizes. A third of the DP3D Combinator and Equipment fees will go directly to special event prize pools!

## ✓ Buyback/DP3D Adoption program

The DP3D Adoption program will buy up any DP3D offered on the DP3D marketplace below current fair market value. 20% of the DP3D Combinator and Equipment fees will be used for this purpose.

## DP3D COMBINATOR アップグレード

The D3PD Combinator takes 2 DP3D's and combines them to return 1 new DP3D. After being entered into the Combinator DP3D's will take around 1-2 days to combine and can result in new species, new traits or new equipment being discovered! The deflationary nature of the DP3D Combinator means the total supply of DP3D's will continually decrease. 33% of the Combinator fees are designated for Special event prizes, with an additional 20% being reserved for the DP3D adoption program.

More details on the DP3D Combinator will be revealed at 1200 DP3Ds minted!

## DP3D GEAR

Equipment is used to steer your chances to a particular kind of prize in the daily and weekly competitions, as well as increase your special event BNB prize rewards. Equipment can also be used to show off in both the social hub and games!

33% of Equipment fees are designated for Special event BNB prizes, with an additional 20% being reserved for the DP3D adoption program.

## Social Hub

The Social hub is a 3D environment for DP3D owners to socialize and show off their DP3D's and equipment, and will be the first part of the DogeVerse to be released. It also serves as a gateway to all the DP3D games and will offer simple social activities and live auction services.

More info will be released at 3000 DP3Ds minted!

# ABOUT US

The DP3D Team

## Marty McDoge

Game design + Programming

## JCVD

3D artist + Programmer

## Luke Dogewalker

Marketing manager

## Vincent Doge

Web design + Backend specialist

The main DogePunks3D team consists of four friends with a technology-focused background in (game) development and ETH mining, driven experts each with their own expertise areas and strengths. Having different backgrounds, nationalities and personalities makes us a strong and diverse team who will always collaborate to find ways to bundle each other's strengths to the benefit of DogePunks3D.

In the creation of the DogeVerse additional contractors in different fields are and have been used that are not part of the core team.
